TOTAL PRODUCTIVE MAINTENANCE TRAINING

ABOUT TPM

Total Productive Maintenance (TPM) aims at establishing a corporate culture that will maximize manufacturing systems effectiveness and build a profitable organization.

WHO NEEDS THE TRAINING?

The TPM system involves all functions of an organization from shop floor employees, production, sales to top management.

TPM SUCCESSES

TPM has been implemented around the world and the following reasons are cited for successes:

- Guarantees dramatic results
- Visibly transforms the workplace
- Raises the level of knowledge and skill of production and Maintenance personnel.
- Creates an environment for sustainable culture change.
- Unleashes the creativity and capability of the people

TRAINING CONTENT:

Any of the TPM 8 Pillars of implementation:

1. Autonomous Maintenance
 - Set and maintain basic machine conditions by developing the skills of operators.
2. Focused Improvement
 - Improvement of equipment efficiency via the pursuit of zero loss, and improvement of technical capabilities.
3. Planned Maintenance
 - Establishment of the plans and a management system to realize zero failure equipment, and prevent failures.
4. Education and Training
 - Establishment of systems to systematically foster personnel proficiency in equipment and work.
5. Safety health and environment
6. Office TPM
7. Early equipment management
8. Quality Maintenance

- The Automotive Industry Development Centre (AIDC) follows the Japan Institute of Planned Maintenance (JIPM) implementation methodology and has assisted the first South African automotive supplier to successfully obtain the Excellence Award certification in Japan through mentoring, coaching and the involvement of experts for successful implementation.
- The AIDC along with participating automotive companies form a TPM cluster in which knowledge, experiences and practices are shared for effective implementation of TPM. As part of this implementation, up skilling of the participating teams plays a very crucial role in the success of TPM in an organization. It is for this reason that AIDC offers support for virtual TPM training to assist its client not to lose momentum under the lockdown regulations.

Offered at:

Virtual: R490 per person/ pillar (2hrs)
Onsite: R890 per person/ pillar (4hrs)
R1290 per person/pillar (8hrs)
